## **Covid 19 High Street Response locations**

Project	Partners	Description	Status	Update
Bishops	Hertfordshire	Traffic lane	Scheme	Locally supported trial that remains in place.
Stortford,	County	removal on	retained	
Station Road	Council,	bridge to		
	East Herts	widen footway		
	District	for social		
	Council	distancing		
Bishops	Hertfordshire	Traffic	Removed	The project was initiated to provide more space for
Stortford,	County	management		those walking and cycling and outside trading.
Town Centre	Council,	to limit vehicle		Further to discussions with Town Council the scheme
	East Herts	access and		was removed. Further options are being considered.
	District	through traffic		
	Council			
Borehamwood,	Hertfordshire	Removal of	Removed	The project was initiated to create space for those
Shenley Road	County	parking in		walking and wheeling; and provide outside trading
	Council,	service road		opportunities. Further to the review of the measures
	Hertsmere	between		and local engagement the scheme was removed.
	Borough	Clarendon		
	Council	Road and		
		Grosvenor		
	11 (6 1 1 1	Road		
Harpenden	Hertfordshire	Traffic	Removed	The project was initiated to create space for those
Bowers	County	management		walking and wheeling; and provide outside trading
Parade	Council, St	& removal of		opportunities. Majority support for a High Street
	Albans City	short stay		Recovery trial in public engagement, but town council
	& District	parking in		opposed, and it was abandoned.
	Council	service road to limit vehicle		
		access and		
		through traffic		
Hertford Fore	Hertfordshire	Removal of	Progressing	Pending a project board final decision, steps are
Street	County	short stay	with	being taken in towards the "future vision" for Fore
Olicot	Council,	parking and	permanent	Street which has been reviewed in conjunction with
	East Herts	revised	traffic	the East Herts Parking Team and a final layout is
	District	loading	regulation	agreed. New parking place orders and changes to
	Council	arrangements	order	the size of the Restricted Parking Zone will assist the
	Council	arrangomonto	(PTRO)	parking team with enforcement and will make it
			( )	easier for customers to understand the parking
				restrictions.
				Plans are being prepared for potential footway
				widening works which could be constructed in the
				near future and will make the area easier to move
				through for those with accessibility issues and enable
				street trading in front of some of the popular
				hospitality units.
Hertford,	Hertfordshire	Traffic	Progressing	The closure of the western end of Fore Street is
Parliament	County	management	with PTRO	progressing to a permanent TRO following
Square	Council,	to limit vehicle		consultation that demonstrated local support.
	East Herts	access and		
	District	removal of		
	Council	through traffic

Project	Partners	Description	Status	Update
Hitchin High	Hertfordshire	Pedestrian	PTRO	Following positive feedback via the consultation the
Street and	County	Zone – 10am	implemented	trail has been made permanent. The change sees the
Market Place	Council,	4 pm Monday		High Street and Market Place being maintained as a
	North Herts	to Saturday		pedestrian and cycle zone from 10am to 4pm each
	Council,			day (except Sundays) when levels of people walking,
	Hitchin BID			wheeling and cycling are at their highest. Building on
				the already fantastic use of tables and chairs Market
				Place is already seeing, HCC Officers are working
				with councillors, the district and Hitchin BID on a
				concept to optimise this flexible space in the historic
				town centre and address drainage and accessibility
				issues. The project will hopefully tie in with the NHC's
IZ	I I - off - ord - leto -	D	Damana	regeneration of the Churchgate Shopping Centre.
Knebworth,	Hertfordshire	Removal of	Removed	The project was initiated to widen footways and
London Road	County	parking on		create space for social distancing and outside
	Council,	London Road		trading. The Knebworth scheme was a temporary,
	North Herts			emergency measure aligned with government
	Council			guidelines to support social distancing following the
				relaxation of Covid-19 restrictions.
				It was removed following least consultation that
				It was removed following local consultation that
Dodlott	Hertfordshire	Removal of	Domovod	supported a return to pre-Covid layout.
Radlett, Watling Street		parking from	Removed	The project was initiated to provide additional space for people walking and outside trading. Planters and
walling Sireet	County Council,	sections of the		various highway measures as part of a semi-
	Hertsmere	service road		permanent arrangement were introduced to enable
	Borough	Service road		social distancing within Radlett town centre. There
	Council			was not support for the trial measures to be retained
	Council			and it was removed.
Rickmansworth	Hertfordshire	Closure to	Awaiting	Rickmansworth High Street has had people walking

Project	Partners	Description	Status	Update
_	Albans City	allow for social		
	& District	distancing		Barriers were removed when social distancing
Ot Alle area	Council	01	Delevetien	measures were relaxed.
St Albans, High Street	Hertfordshire County Council, St Albans City & District Council, St Albans BID	Closure to through traffic  Initially at all times then restricted to weekends only to create an improved environment for people walking and cycling in the city centre and to provide space for outside trading	Relaxation of Experimental traffic Regulation Order (ETRO)	Initially implemented to enable more space for people accessing the city centre and then to support the hospitality businesses in the area the High Street was closed to through traffic.  Following an initial engagement process, it was agreed that aa phased trial approach should be taken with the closure removed to enable local roadworks to be undertaken and for monitoring to take place.  In November 2022 the road was closed at weekends only form Friday night to Monday morning. This was with a view to a second phase being promoted that would return to a 7-day closure.  Following feedback and a further engagement exercise on the city centre measures it was agreed with the board that the road should be reopened to traffic and the second phase to close the road 7 days a week would be cancelled.  Phase 3 of the trial will see George Street (see below) closed to traffic from 11am Saturday through to 7am Monday. High Street will not be closed to traffic, but the gates will remain to allow for closures to traffic for special events.  A comprehensive monitoring and evaluation plan has been established and is ongoing.
St Albans, George Street	Hertfordshire County Council, St Albans City & District Council, St Albans BID	Closure to traffic between 11am Saturday and 7am Monday to provide space for social distancing and outdoor hospitality	Relaxation of Experimental traffic Regulation Order (ETRO)	George Street was initially closed to through traffic other than deliveries in order to provide additional space for social distancing and subsequently the hospitality businesses in the street.  The measures were temporally removed to facilitate road works and enable monitoring to take place.  More robust measures were reintroduced in November 2022 and the road closed to through traffic.  At the end of the trial following a further consultation and engagement with businesses and residents' groups and further phase is under way that sees George Street closed to traffic from 11am Saturday through to 7am Monday. High Street will not be closed to traffic, but the gates will remain to allow for closures to traffic for special events.
St Albans, Market Place	Hertfordshire County Council, St Albans City & District	Removal of traffic between 7am and 11am to provide space for social	Progressing with Permanent traffic regulation	The road has been reallocated to pedestrian space with vehicle access from 7am to 11am each day when loading is able to take place to the shops. This arrangement is to be made permanent following the Experimental Traffic Regulation Order (ETRO) process in November 2023, meaning that pedestrians

	Council, St Albans BID	distancing and outdoor hospitality	order (PTRO)	will continue to have priority in that location. A further order will be made in conjunction with St Albans District Council in the coming year to consolidate the many different traffic regulation orders currently present dating back to the 1970s. This will ensure that traffic and parking enforcement is easier and more effective for everyone. We have also started conversations with our landscape architects to begin the process of looking at opportunities for urban realm and accessibility enhancements in order to be ready for any future funding opportunities.
Ware	Hertfordshire County Council, East Herts District Council	One way system to enable the widening of footways supported with a reduced 20mph limit and on-street parking restrictions	Removed	The Ware scheme was a temporary, emergency measure aligned with government guidelines to support social distancing following the relaxation of Covid-19 restrictions.  The initial one way flow was reversed following feedback and the measures remained in place whist social distancing was a requirement.  Following engagement with the local community the scheme was removed.
Watford, High Street	Hertfordshire County Council, Watford Borough Council	Removal of traffic from the High Street between king Street and Market Street -	Handed over to WBC	Locally engaged upon by Watford and promoted as a permanent scheme with camera enforcement.
Welwyn, High Street	Hertfordshire County Council, Welwyn Hatfield Borough Council	Widened footway sections and parking management to improve areas for social distancing and access.	Removed	Following an initial change to make the High Street one-way, this was returned to two-way traffic with the implementation of a 20mph area. This supported social distancing and greater road safety in the High Street. This was achieved using planters to narrow the carriageway, which changed the environment of the road to enable the 20mph area.  Some elements of the project have been retained and the High Street is within the potential Welwyn 1 scheme, part of the wider 20mph programme.
