INTRODUCTION

– your responsibilities

• This handbook is for everyone who drives a minibus for Hertfordshire County Council. That includes those owned or operated by schools and other departments, and anyone who borrows a HCC minibus for external use. We encourage other schools and organisations to follow this guide too.

• A minibus is defined as a small bus built or adapted to carry 9 to 16 seated passengers. Compared to even the largest cars, it is longer, wider, taller and a good deal heavier, especially when fully loaded with 16 passengers.

• Driving a minibus puts extra demands on you, particularly if you normally only drive cars, or if driving is not your main occupation.

• The safety of your passengers is of paramount importance. They (and their families) put their trust in you to deliver them to their destination in safety and comfort.

• No matter who owns the vehicle, you are legally responsible for it while you are the driver. You must ensure that you have the correct licence and hold a current HCC minibus permit card. The vehicle must be roadworthy, with tax, MOT, and insurance to cover you.

• Allow time to check the vehicle before you use it. Plan your journey to suit the needs and safety of your passengers. This may require a second driver to share the driving and if your passengers are children and/or they have special needs you may need more helpers to take care of them.

• The pages that follow give details of how you can carry out these responsibilities. More help and advice are available from the useful contacts on page 26. The Hertfordshire County Council Minibus Manual gives detailed advice and information. It is available online at www.hertfordshire.gov.uk/minibus

The information contained in this guide is based on the law as at 1 November 2017 and is subject to change.

WHO CAN DRIVE A MINIBUS FOR HCC?

Law

All drivers must be over 21 and hold a full Category B (car) licence.

To drive a minibus for your employer you must also have Category D1 entitlement. (Note: HCC’s legal advisers consider that teachers are driving school minibuses as part of their paid employment, whether during school hours or not.)

Car licences held before 1 January 1997 normally include D1 with restriction code 101. This means that the vehicle must not be used for hire or reward, unless it is operated under a valid Section 19 Permit (see page 8). However, this is not valid outside UK (see page 22). Old licences show this entitlement as Group A.

Car licences first obtained after 1 January 1997 do not automatically include D1. To drive for your employer you must obtain Category D or D1 entitlement by passing a medical and the Passenger Carrying Vehicle (PCV) theory and practical driving tests (see page 6).

Drivers reaching age 70 and thereafter must pass a medical examination and apply to DVLA to retain their minibus D1 entitlement each time they renew their licence.

See useful contacts on page 26 for information on getting licensed and trained.

Unpaid volunteers may drive a minibus weighing up to 3500kg without D1 on their licence for social purposes and only if they have held a full car licence for more than 2 years, but they must not receive any payment or consideration for doing so, other than out of pocket expenses. They may not tow any size trailer or drive outside the UK.
HCC Policy

Prior to driving a minibus on Hertfordshire County Council activities, or borrowing a minibus from one of our establishments, you will be required to sign a DVLA mandate, authorising us to check your driving licence status.

You must obtain a permit to drive from the council’s Transport Access & Road Safety Unit (TARS) by doing one of the following:
• achieve the required standard in an assessment with one of the council’s registered assessors, or
• produce your driving licence to show you have passed the PCV test within the last 5 years (see page 6)

Prior to driving a minibus fitted with a tail-lift or wheelchair access equipment (‘welfare bus’), you must satisfy a Council approved assessor of your competence, including the use of the additional safety equipment. Any establishment using this type of vehicle must ensure that drivers and passenger assistants are trained in its use.

If you are successful, the assessor will issue a certificate of competence to you. TARS will send you a permit to drive on County Council business, either when advised by the assessor OR (for minibuses only) the first time you produce your driving licence showing full Category D or D1 entitlement having passed the PCV test within the last 5 years.

Permits for minibus drivers are valid for 5 years and ‘welfare buses’ are valid for 3 years. A re-assessment is then required for all drivers to renew their permit.

For details of authorised assessors, contact the Driver Training Officers in TARS (see page 26).
If you passed your car (Category B) driving test after 1 January 1997, your licence restricts you to vehicles with up to 8 passenger seats (excluding the driver) and a Maximum Authorised Mass of 3500kg. To drive a minibus (9 to 16 passenger seats) you must be aged 21 or over and hold Category D1 entitlement.

Getting this entitlement can be a costly process, but when you qualify you will have demonstrated an ability above that of the ordinary car licence holder.

For advice in training aids and how to prepare for the PCV test, contact the Driver Training Officers at HCC (see page 26).

The process is summarised as follows:

1. Obtain forms D2 (Application for a Driving Licence for large vehicles) and D4 (Medical Examination for driving large vehicles). These are available from DVLA, Swansea Tel: 0300 790 6801 or their website www.gov.uk/dvlaforms’.

2. Ask your GP or a suitably qualified doctor to examine you and complete the form D4. There will be a fee for this. Ensure the doctor signs and stamps the form.

3. Complete form D2, ticking the boxes to apply for a Provisional Licence for Categories C and D – this covers all large vehicles including minibuses to save reapplying for others in the future. Send the completed form D2 with your current licence and the completed form D4 to DVLA. The Post Office offers a checking service to ensure no errors have been made in your application.
4. Study for the Theory Test for Passenger Carrying Vehicles. When you receive your provisional licence you can take the test. It is done on a touch-screen computer. You must correctly answer a number of questions, then identify the developing hazards shown in a series of video clips.

5. Take tuition in the minibus with an instructor who has passed the PCV test and has held a full category D or D1 licence for at least 3 years. L-plates must be displayed.

NOTE it is illegal to drive any PCV on a provisional licence unsupervised. Drivers who passed their car test before 1997 are not licensed to supervise you in a minibus unless they have passed the PCV test themselves and held category D or D1 entitlement for at least 3 years.

6. When you have passed the Theory test, you may attempt the Practical PCV test. When you have passed the practical test, send your licence and pass certificate to DVLA to have your full entitlement added.

7. You must not drive a minibus unaccompanied until you receive your new photocard licence showing the D1 entitlement.

8. You will be exempt from the Driver CPC when driving a minibus that is used for the non-commercial carriage of passengers (see Section 19 Permits on next page).
HIRE OR REWARD

– Why your vehicle needs a Section 19 Permit

Hire or Reward
If the Operator of a vehicle built or adapted to carry 9 or more passengers accepts any payment, in cash or kind, which gives a person the right to be carried on the vehicle, regardless of whether or not that right is exercised, this is known as “Hire or reward”.

The payment may be made by the passenger or on the passenger’s behalf, such as the contributions made by parents for their children to take part in off-site school visits, even if the payment made is only intended to cover admission fees or tickets to events.

Normally, the law requires the operator to have a Public Service Vehicles Operator Licence (commonly known as an ‘O’ Licence).

Section 19 Permits
Schools and non-commercial organisations are exempt from PSV Operator Licensing if they hold a valid Section 19 Permit for each vehicle in use. The operator must ensure the permit disc is displayed on the vehicle. Permits last 5 years but are not valid outside the UK. All journeys abroad therefore require fully licensed drivers who have passed the PCV test (see page 22).

HCC establishments can obtain permits from the Transport Access and Road Safety Unit, County Hall. Other organisations should apply to the Traffic Commissioners (see Useful Contacts page 26).
Some would say that driving a minibus is similar to driving a car. But by definition, a minibus is a small bus, not a large car. It can be more demanding and tiring and there are significant differences that you need to think about. That is why training and assessment is important, to ensure that each driver is competent and fully aware of the effects of the following points.

A minibus is…

- **Heavier**
  - Up to 3 times the weight of a car when loaded
  - Takes further to stop
  - Slower acceleration, less power for hills or overtaking
  - Lower average speeds, so journeys take longer than in a car

- **Higher**
  - More body roll, pitch and sway
  - Cross winds have more effect on handling
  - Risk of hitting objects overhead

- **Noisier**
  - Less sound-proofing than cars
  - More passengers can cause noise & distractions

- **Wider & longer**
  - More cumbersome to manoeuvre
  - Restricted view to rear and sides

- **Less comfortable**
  - Passengers can feel cramped on long journeys
  - Driver’s seat not as comfortable as car
  - Ventilation & heating systems not as efficient
Five S’s for good driving

- **Safety**
  - Safety must come first
  - Concentrate on the job in hand and minimise risks
  - Your passengers’ lives are in your hands
  - Are you fit to drive? Properly rested, free from the effects of illness, medication and alcohol.

- **Smoothness**
  - Your passengers deserve a comfortable ride.
  - Try to steer, accelerate, change gear and brake smoothly and progressively.
  - Brake in plenty of time, before changing down.

- **Systematic**
  - Observe well ahead and keep checking both side mirrors
  - Anticipate what is likely to happen
  - Prioritise hazards, so you are ready to deal with each one
  - Decide the best Position, Speed and Gear for each situation
  - Act decisively

- **Style**
  - A professional, patient attitude gets results
  - Stay cool, calm and in control

- **Speed**
  - Your progress will be slower than a car
  - Choose speeds that are comfortable for your passengers
  - Make sure you can always stop safely
  - Stay legal – if you speed, you pay the fine
Unless lower limits are in force, the following maximum speeds must not be exceeded:

**Minibuses not exceeding 12m in length**

<table>
<thead>
<tr>
<th>Road Type</th>
<th>Maximum Speed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Motorways</td>
<td>70mph</td>
</tr>
<tr>
<td>Dual Carriageway</td>
<td>60mph</td>
</tr>
<tr>
<td>Other Roads</td>
<td>50mph</td>
</tr>
</tbody>
</table>

Minibuses first registered on or after 1 January 2005 must be fitted with a speed limiter set to 100 kph (approx 62 mph). These vehicles are banned from using the right-hand lane of motorways where 3 or more lanes are open for traffic.

Everyone can fall into bad habits, so treat every drive as a test and aim for the best you can achieve. Keep up to date with the law, driving techniques and good practice. Update your knowledge of the Highway Code – ignorance is no excuse. See www.gov.uk/the-highway-code’.
As the driver, you must ensure the following documents are in order, and where necessary carried or displayed in the minibus.

- **Your driving licence** – must be current and valid for vehicles in Category D1. You must be able to produce your licence to anyone who needs to see it.

- **HCC Minibus Driver Certificate** – you must have the owner’s permission to drive the vehicle.

- **Insurance** – must be valid and covers you to drive.

- **MOT** – minibuses must be tested by authorised centres.

- **Vehicle Excise Duty** – check that the vehicle you are driving has been taxed. You can do this online at [www.gov.uk/check-vehicle-tax](http://www.gov.uk/check-vehicle-tax).

- **Section 19 Permit** – the operator must have a permit displayed in the windscreen to accept any payments from passengers. Note Section 19 Permits last 5 years and are not valid outside UK.

- **Vehicle log** – record dates and times of who is driving, the purpose of the journey, any faults that arise.

- **Tachograph** – required for ‘hire or reward’ journeys in UK, unless operating under a Section 19 Permit, and for all journeys outside UK.
As the driver, you are legally responsible, together with the owner, for the vehicle’s roadworthiness.

This need not be an onerous task, and a few simple checks will help avoid breakdowns or falling foul of the law. Prevention is better, cheaper and quicker than cure! Mirrors, windscreen and windows must be clean, clear, safe and secure.

Beware of hot engine parts when opening the bonnet! It is best to check fluid levels when the vehicle has stood and cooled for 1 to 2 hours. The letters P.O.W.E.R. help to remember the main items.

- **Petrol (or Diesel)**
  - Have you enough for the journey, or at least to reach a filling station on your route? Check which fuel the vehicle uses (mistakes are expensive). Do NOT carry any fuel can in the minibus - this is dangerous and illegal.

- **Oil (engine oil, brake and power steering fluids)**
  - When the engine has cooled, check the **dipstick**. Use a clean dry cloth or tissue to wipe it. Too little or too much oil is harmful.
  - The **brake** fluid reservoir is a translucent plastic container. It should be possible to see the level through the container without opening it. Ensure the level is between the Max and Min marks.
Water (coolant and screen washers)
➤ **Danger** - do not open the radiator reservoir if the engine is hot!
➤ If the **coolant** needs topping up, ensure the correct anti-freeze mixture is maintained.
➤ **It is illegal** to drive without working screen washers. Top up using a mixture of water and screen wash fluid. **All glass** must be clean.

Electrics (lights, battery)
➤ **All lights** must be working, clean and properly adjusted to prevent dazzling other road users. Check warning lights are working when you switch on the ignition. It makes good sense to keep spare bulbs and fuses so that faults can be rectified quickly.
➤ The **Battery** must be firmly secured and the terminals tight.

Rubber (tyres, wiper blades, drive belts)
➤ **Tyres** must be inflated to the correct pressure – refer to the handbook, taking care not to confuse p.s.i. with BAR. Check them when they are cold, including the spare.
➤ **Tread** must be at least 1.6mm; look for uneven wear, cuts and defects.
➤ **Wiper blades** should be kept clean and replaced when worn.
➤ **Drive belts** should be checked for signs of wear. Loose belts may mean the battery will not charge or the water pump will not work.

You must also ensure there is a fire extinguisher and first aid kit in the minibus. Both these must be maintained in good order. This is a legal requirement.
As the driver, you are responsible for the safety and comfort of your passengers. Keep this in mind from the beginning to the end of your journey.

**Picking Up**
Wherever possible, park where your passengers can board safely from the pavement using the side door. If it is necessary to use the rear door, supervise them to make sure they keep away from passing traffic.

**Luggage**
Luggage must be stowed safely; gangways and emergency exits must be kept clear. All passengers must have unrestricted access to two escape routes.

**Behaviour**
Sixteen passengers can cause many distractions and you need to concentrate on the driving. Ask everyone to keep noise to a minimum and avoid talking to you unless it is necessary. Before you move off, make sure everyone is properly seated, wearing a seat belt and the doors are closed but not locked.

**Comfort**
On the journey, try to give a comfortable ride by driving smoothly. From time to time, check that the passengers have enough ventilation and/or warmth.

**Setting Down**
Park so that passengers do not have to get out into traffic. Avoid using the rear doors except in an emergency. Make sure everyone takes their belongings and any litter with them.
Emergency procedures
Before you set out, make sure your passengers know your procedures for an emergency, such as evacuation if a fire starts, or the vehicle breaks down. This should form part of the risk assessment for the journey. Think of your passengers’ needs.

There must be unobstructed access from every seat to at least 2 doors.

As quickly and safely as possible you need to:
- Stop the vehicle well over to the side or on the hard shoulder
- Put on a hi-vis jacket or coat
- Get everyone out of the vehicle. Supervise to keep them in a safe place away from traffic
- Phone 999 or get someone to do it for you
- Only use a fire extinguisher if you can do so without endangering yourself or others

Remember it is never worth risking a life to save a vehicle.
The table below gives a summary of the law on wearing seat belts. The driver is legally responsible for passengers as shown, but you have a Duty of Care to make sure everyone you carry in a minibus wears a seat belt.

<table>
<thead>
<tr>
<th>Who is responsible?</th>
<th>Front Seat</th>
<th>Rear Seat</th>
</tr>
</thead>
<tbody>
<tr>
<td>Driver</td>
<td>Seat belt must be worn.</td>
<td>Driver</td>
</tr>
<tr>
<td>Child under 3 years of age.</td>
<td>Correct child restraint must be used.</td>
<td>Correct child restraint must be used.</td>
</tr>
<tr>
<td>Child aged 3 to 11 and under 1.35 metres (approx. 4ft 5in) in height.</td>
<td>Correct child restraint must be used.</td>
<td>Correct child restraint must be used if available.**</td>
</tr>
<tr>
<td>Child aged 12 or 13 or younger child 1.35 metres or more in height.</td>
<td>Adult seat belt must be worn.</td>
<td>Adult seat belt must be worn.</td>
</tr>
<tr>
<td>All other passengers (age 14+)</td>
<td>Seat belt must be worn.</td>
<td>Seat belt must be worn.</td>
</tr>
</tbody>
</table>

**The Law requires that an individual seat and seat belt must be provided for each child aged 3-15 years on all organised trips carrying 3 or more children in a minibus or coach. Children must wear a restraint that is designed for their age and weight in the front seats.

In the rear seats, if an appropriate child restraint is available it must be used, but minibus operators are not required to provide them.
For further information and advice on seat belts and the law, contact the Driver Training Officers in TARS at HCC (see page 26).

The penalty for seat belt offences is either:
   a) A fixed penalty of £100 or
   b) A maximum fine of £500 (as at November 2017)
Your passengers rely on you to get them to their destination safe and sound. If you spend a little time planning the journey and preparing the vehicle, you will avoid many problems on the way.

Think about the needs of your passengers. Sitting in a minibus for a long time can be tiring and uncomfortable, especially as the heating and ventilation are unlikely to be as good as a car. You and they need a chance to stretch your legs and answer the call of nature. Most of all you need a rest from the concentration required to drive safely.

- Work out your route and try to calculate the journey time. As a suggestion, multiply the total mileage by 2 to get the approximate number of minutes, but allow extra if you know you will be going through congested urban areas. Consider using one of the route-planning services available on the Internet. Check online or radio for possible hold-ups caused by roadworks.

- Get plenty of rest before the journey, so that you are fresh and alert. Drink plenty of water beforehand and when you stop, to guard against dehydration, which is known to affect concentration levels. For long journeys you need 2 drivers.

- Plan breaks every 2 hours, but stop sooner if you get tired. Rest stops should last at least 15 minutes. Try to choose somewhere where toilets and refreshments are available.
– safe driver’s hours

Driving a minibus can make extra demands on the driver’s concentration, particularly for people whose main job is not driving. Falling asleep at the wheel, or even just losing concentration for a few seconds, can have lethal consequences. Tired drivers have caused thousands of crashes, including some tragedies involving minibuses.

**Recommended Hours for Drivers**

For all minibus drivers, whether employed or volunteers, Hertfordshire County Council strongly recommends the guidance issued by RoSPA, (incorporating the Domestic Drivers Hours Rules):

- If you do no other work than driving, your maximum working day should be 13 hours, of which you should spend no more than 9 hours driving.

- If you do any other work as well as driving, your maximum working day, taking account of other work undertaken before starting a journey, should be 10 hours, of which you should spend no more than 4 hours driving.

**All drivers** should take a break every 2 hours (or sooner if tired). The break should be a minimum of 15 minutes. Second and subsequent breaks may need to be longer to prevent fatigue. After 4.5 hours of driving, the accumulated length of breaks from driving should be at least 45 minutes.

Between one working day and the next, you should have a rest period of at least 11 hours, during which you can get adequate sleep. You should have a weekly rest period of at least 45 hours.
Example:

Driving only

<td></td>
</tr>
</tbody>
</table>

- Make sure you have sufficient sleep before a journey and rest breaks during a journey to maintain your alertness. Regular breaks are important for the comfort of passengers as well.

- Drivers should not be required to supervise children or other passengers during their break, as this would not be a rest for the driver. With each additional driving period, the break time should be extended.

- Second drivers should also have adequate rest breaks, without being required to supervise children. It is good practice to swap drivers at each rest stop on a long journey.

- No one should be expected to do a day’s work (regardless of the type of work), or be awake for a day, and then drive for several hours in the evening.

- On journeys lasting several days fatigue caused by consecutive days on duty must also be taken into account.

- The above guide represents safe working limits for all drivers, whether driving is their main job or not. Experts in driver fatigue now say that even full time drivers should take regular breaks every 2 hours.
Taking a minibus abroad is not an easy exercise. Imagine the problems that could be faced if the authorities stop the minibus and find it is being driven illegally.

The Hertfordshire County Council Minibus Manual, Section 3 gives detailed advice and information on what is required. It is available online at www.hertfordshire.gov.uk/minibus

Before taking a minibus abroad, you will need:

- Tachograph with digital card for each driver (drivers must know how to use the tachograph)
- Full licence for each driver, showing D1 minibus entitlement* (see Driving Licences below)
- Waybill** if using a hired vehicle – this also applies if you are being lent a vehicle (see below for definitions) OR
- Own Account Certificate*** if using your own vehicle
- Full passport valid until well after the end of the trip
- European Health Insurance Card (EHIC) valid until well after the end of the trip
- Letter of authority to drive from the Registered Keeper
- Vehicle Registration Document (V5) not a copy, or a Vehicle on Hire Certificate (form VE103)
- Insurance Certificate, Green Card and European Accident Form’
- Adequate breakdown cover and travel insurance
- Nationality (GB) plate affixed to the rear of the vehicle
- Spare bulbs and/or warning triangles are legally required in many European countries
- A hi-vis jacket or coat must be available for the driver(s) to put on before alighting from the vehicle
- In France, 2 breath-test kits must be carried, but remember Don’t Drink and Drive
- Headlights must be suitably adapted to prevent dazzle. In some countries dipped headlights are required during daylight as well as at night.

Documents should not be left unattended in the vehicle.
**Driving Licences**

The “Hire or Reward” issue is particularly important. It is rare for any journey to be provided entirely free of charge, so it is likely that most trips abroad by schools, scout groups and similar organisations running a minibus, would be viewed by the courts as being for Hire or Reward. For these journeys, all drivers must hold a full Passenger Carrying Vehicle driving licence obtained by passing the PCV driving test in a minibus (category D1) or in a bus or coach (category D), which also covers minibuses.

For drivers who have held a car licence since before 1 January 1997, their licence already entitles them to drive a minibus (Category D1), but only when the vehicle is not being used for Hire or Reward, i.e. everyone travels completely free of charge.

Drivers who obtained a car licence after 1 January 1997 are not permitted in any circumstances to drive a minibus outside UK, whether for Hire or Reward or not, unless they pass the PCV driving test to gain Category D or D1 entitlement on their licence.

**Waybill**

A waybill must be carried if the vehicle has more than 8 passenger seats, regardless of how many passengers are being carried and irrespective of whether it is operating for “hire or reward”. A waybill is therefore required for a private minibus going abroad. The EU waybill is available in books of 25 duplicate copies from the Confederation of Passenger Transport (CPT) (see Useful Contacts page 26). However, if the vehicle used is the property of the operator, such journeys can be carried out under an Own Account Certificate instead of a Waybill.

**Own Account Certificate**

International journeys carried out within the EU by a non-profit making body for the transport of its members in connection with it’s
social objectives fall within the category of own account operations. Own Account Certificates are valid for up to five years and are available free of charge from the DVSA (see page 26).

**Tachograph**
This device records each driver’s hours of driving, other work, breaks and rest periods. It is an offence to use a minibus on trips abroad without proper use of the tachograph. Each driver must have a valid Tachograph card issued by DVLA and be trained in its correct use.

For international trips, the tachograph must be used from beginning to end of the driver’s duty, including time in the UK.

**Plan breaks and rest periods**
Although the EC Drivers’ Hours Rules allow driving for up to 4 hours before a break is taken, experts in driver fatigue strongly recommend a maximum of 2 hours driving at a time. Then take a break of at least 30 minutes and/or change drivers. There are also strict rules about the total number of hours that each driver may be on duty per day and per week. More details can be found on the Dept for Transport web site [www.gov.uk/drivers-hours](http://www.gov.uk/drivers-hours)

During any breaks you must not drive or undertake any other work, for example supervising passengers in or outside the vehicle. Breaking these rules is dangerous and can result in fines and loss of licence.

**Watch your speed**
Note that the speed limits for minibuses are lower in many countries compared to Britain. Make sure you know the speed limits for the countries you are driving through. Some countries have on the spot fines and you will be liable for payment.

*France – speed reduced to 80 kph in wet weather and 50 kph in poor visibility, including spray & ice

**Germany – 30 kph (19 mph) in local residential areas (sign – blue square showing children playing).

You should also find out about driving rules for the countries you are visiting. Apart from driving on the right, priorities may be different at roundabouts and junctions. Some signs differ from the UK. Information is available online from the major motoring organisations.
